

Remediation Services

DTS offers one-stop remediation services to address known vulnerabilities and meet regulatory requirements or standards. We provide all of the system and process work you'll need ahead of a NIST score report, CMMC or ISO 27001 assessment, or other certification, as well as licenses and implementation.

Every remediation project at DTS is unique, not a package stuffed with extras you don't understand or don't need. Our experts work with you to determine your current stance, future needs, and outline remediation options for your budget. We can work with your IT team or handle everything, allowing you to stay focused on your core business.

Regulatory Compliance

DTS helps you make sound, educated choices for your security posture, meeting regulatory requirements for your industry, the U.S Federal government, and other contracts.

- » NIST 800-171
- » NIST 800-53
- » DFARS 252.204-7012
- » FAR 52.204-21
- » ISO-27001
- » SOC 2 TYPE 1 and TYPE 2
- » HITRUST

CMMC

For contractors in the Defense Industrial Base (DIB) protecting CUI is essential. The evolving CMMC standards currently has 320 assessment objectives and require documentation. It's a big lift for any size company but few small and medium-sized contractors have the experienced resource to do it internally. DTS is the ideal partner, offering expertise in both policy work and remediation solutions to prepare you for certification.

1. Scoping your CMMC environment
2. Documenting policies and procedures, tailor IMPM to your needs
3. Properly configure security settings and connect assets to the network

Work directly with DTS experts

Cybersecurity compliance isn't a new challenge, but increasingly complex technical standards and evolving policies require operational changes for many organizations.

Our CISSP-certified and experienced professionals work directly with your leaders, explaining the standards and controls and identifying gaps in your practices so you can make informed choices about remediation options. Every service is customized for your systems, your structure, and the standards you follow.

Cybersecurity services. Exceptional results.

DTS provides tailored, scalable cyber solutions for small and medium-sized organizations. We use top resources and the expertise of talented individuals with a passion for excellence to help protect our clients' people and data. Our approach is consultative and education-oriented, so you can be confident that your DTS solution is strong, reliable, and helping to drive a culture of compliance.

In addition to our assessment and review services, DTS offers

SECURITY REVIEWS AND ASSESSMENTS

Our thorough assessment services help you understand your current cybersecurity posture and compare your stance to required or best practice controls and architecture. Gap analysis is an insightful first step that can inform your cybersecurity strategy, provide a benchmark, or prepare your organization for self-scoring or audits.

MANAGED NETWORK & CYBERSECURITY SERVICES

Our expert team offers a value-added blend of Managed IT and Managed Security Service Provider (MSSP) services. We support cloud environments, on-premises hardware configurations, monitoring and maintenance, policies, procedures, training, and emergency response, all with an eye for continual improvement and operational efficiency.

FRACTIONAL CIO

The IT leadership you need—without the expense associated with adding a senior executive. Our experienced leaders provide the technical direction to support your business objectives and implement a broad technology agenda that leverages leading-edge technologies.

Remediation for a new security mindset

Shift from a mindset of defense to one of “mitigate and manage.” Our educational approach to remediation helps you better understand regulatory standards and feel confident in your compliance. Use a robust cybersecurity stance to:

- » Build business opportunities
- » Grow trust among your stakeholders
- » Make informed choices for your security posture
- » Meet regulatory requirements for your industry, the U.S Federal government, and other contracts

Take the first step towards compliance: understanding the scope and real costs

Our assessment process

- Review organizational systems and environments
- Conduct architecture review of technology, vendors, and services
- Consultation throughout the assessment process, providing you a deeper understanding of controls, documentation requirements, and your existing systems
- Detailed report on your status or score, and remediation recommendation, if desired
- Conduct mock CMMC and other third-party assessments
