

Managed Network and Cybersecurity Services

Technology and cybersecurity threats are constantly evolving. Our expert team keeps you ahead of threats with managed services for monitoring and maintenance, policies, procedures, training, and emergency response. Combining the roles of a Managed Network Services Provider (MNSP) and a Managed Security Service Provider (MSSP), DTS delivers value, with an eye for continual improvement, and operational efficiency.

Tap our expert team for full-service support, help with specific IT and cybersecurity tasks, or fulfilling the roles of required Key Implementation Personnel. Our security-focused managed services can be tailored for your specific needs, including:

- » On-premise hardware configuration
- » Security configuration management
- » Maintain and review audit logs and documentation
- » Security automation
- » Continuous monitoring
 - Security incident response
 - Emergency response
- » Apply software updates and security patches
- » On-demand support
- » Data backups
- » Network and security assessments
- » Recommend policies and procedures
- » Employee training
- » Support during certification assessments

Our network and cybersecurity staff are available to you to answer questions about technology and provide you with timely support.

Work directly with DTS experts

Our approach to managed services is unique. Our certified and experienced professionals work with you, explaining the services we provide and your system performance while driving security through careful monitoring and logging, more efficient processes, and more secure policies. For confidence in your cybersecurity. For smooth operations. For compliance.

DTS helps flip the script, from a reactive approach to a more strategic approach that enhances operations and addresses potential issues before they impact business. With a predictable fee and access to additional resources and expertise, our managed network and cybersecurity services make your business run better.

Self-managed vs. Management as a Service

Considering managing your network and cybersecurity program yourself? It takes a staff of knowledgeable, experienced, key personnel to maintain compliance by conducting monitoring and logging activities, regular audits, vulnerability scans, and any security incidents. Plus, someone to head up security training for staff. SMBs often can't invest in those salaries and maintaining the knowledge base. If you're considering self-management, talk to DTS to understand the scope of the commitment, get the ad-hoc support you may need, or schedule our team to provide an audit or security assessment to verify and validate your program.

Cybersecurity services. Exceptional results.

DTS provides tailored, scalable cyber solutions for small- and medium-sized organizations. We use top resources and the expertise of talented individuals with a passion for excellence to help protect our clients' people and data. Our approach is consultative and education-oriented, so you can feel confident that your DTS solution is strong, reliable, and helping to drive a culture of compliance.

In addition to our assessment and review services, DTS offers

SECURITY REVIEWS AND ASSESSMENTS

Our thorough assessment services help you understand your current cybersecurity posture and compare your stance to required or best practice controls and architecture. Gap analysis is an insightful first step that can inform your cybersecurity strategy, provide a benchmark, or prepare your organization for self-scoring or audits.

REMEDIATION

Our one-stop remediation services focus on cost-effective solutions that close gaps and meet regulatory requirements, from reviewing and updating policies and procedures to training employees.

FRACTIONAL CIO

The IT leadership you need – without the expense associated with adding a senior executive. Our experienced leaders provide the technical direction to support your business objectives and implement a broad technology agenda that leverages leading-edge technologies.

Managed services for a new security mindset

Shift from a mindset of defense to one of “mitigate and manage.” Our educational approach to managed IT and cybersecurity services helps you better understand regulatory standards and feel confident in your compliance. Use a robust cybersecurity stance to:

- » Build business opportunities
- » Grow trust among your stakeholders
- » Make informed choices for your security posture
- » Meet regulatory requirements for your industry, the U.S. Federal government, and other contracts

Add DTS to your team. Call for a free assessment and an estimate to get things started.
