

Security Reviews and Assessments

At DTS, our thorough assessment services help you understand your current cybersecurity posture and compare your stance to required or best practice controls and architecture. Gap analysis is an insightful first step that can inform your cybersecurity strategy, provide a benchmark, or prepare your organization for self-scoring or audits.

Use DTS services for a one-time review or as the first step towards better cybersecurity. Our assessment services are used for:

- » Scoring for specific programs and controls
- » ISO 27001 assessments
- » NIST reporting and attestation
- » CMMC assessments
- » Other certifications
- » Authorization to Operate

You may be familiar with cybersecurity requirements but not confidently know where your company falls in the process. DTS helps you calculate your score and help you determine how and when to report that number. A baseline or score is often required for bidding or teaming on DoD contracts—to lower the cost of cybersecurity insurance, and to establish stakeholder relationships around proprietary information.

Work directly with DTS experts

Cybersecurity compliance isn't a new challenge, but increasingly complex technical standards and evolving policies require operational changes for many organizations. DTS is a trusted partner in the process, handling or augmenting your IT and cybersecurity needs, so you can remain focused on your core business.

Our CISSP-certified and experienced professionals work with you, explaining each standard or practice, detailing what is required of your organization, identifying gaps in your practices, and providing remediation options. Every service is customized for your systems, your structure, and the standards you follow.

Cybersecurity services. Exceptional results.

DTS provides tailored, scalable cyber solutions for small and medium-sized organizations. We use top resources and the expertise of talented individuals with a passion for excellence to help protect our clients' people and data. Our approach is consultative and education-oriented, so you can be confident that your DTS solution is strong, reliable, and helping to drive a culture of compliance.

In addition to our assessment and review services, DTS offers:

REMEDIATION

Our one-stop remediation services focus on cost-effective solutions that close gaps and meet regulatory requirements, from reviewing and updating policies and procedures to training employees.

MANAGED NETWORK & CYBERSECURITY SERVICES

Our expert team offers a value-added blend of Managed IT and Managed Security Service Provider (MSSP) services. We support cloud environments, on-premises hardware configurations, monitoring and maintenance, policies, procedures, training, and emergency response, all with an eye for continual improvement and operational efficiency.

FRACTIONAL CIO

The IT leadership you need – without the expense associated with adding a senior executive. Our experienced leaders provide the technical direction to support your business objectives and implement a broad technology agenda that leverages leading-edge technologies.

Assessment services for a new security mindset

Gain visibility into your cybersecurity stance, including processes, assets, and risks. Shift from a mindset of defense to one of “mitigate and manage.” DTS’s consulting approach to assessments helps you use your cybersecurity stance to:

- » Build business opportunities
- » Grow trust among your stakeholders
- » Make informed choices for your security posture
- » Meet regulatory requirements for your industry, the U.S Federal government, and other contracts

Our assessment process

- Review organizational systems and environments
- Conduct architecture review of technology, vendors, and services
- Consultation throughout the assessment process, providing you a deeper understanding of controls, documentation requirements, and your existing systems
- Detailed report on your status or score, and remediation recommendation, if desired
- Conduct mock CMMC and other third-party assessments
