Federal-Ready Cybersecurity

Build a Secure Environment That Grows With Your Business

Secure + Compliant + Operational = Mission Ready

DTS brings secure cloud architecture, managed security and IT, continuous compliance, and end-user operations together through **one accountable partner**. Your environment, documentation, and operating model **stay with your organization** and can **expand as your contracts, users, and requirements evolve**.

What We Deliver

Secure Cloud & Infrastructure

Government Cloud Foundation
GCC/GCC High architecture, migration, hardening, and secure baselines.

Identity & Data Protection
Access controls, multifactor authentication, privileged account protection, encryption, data loss prevention, and secure endpoints.

Resilience & Growth
Backup and recovery with scalable options for virtual desktops, secure software development, and new workloads.

Continuous Compliance & Governance

Compliance Management
Keep controls, policies, and procedures aligned to cybersecurity standards such as the NIST SP 800-171.

Evidence & Self-Assessment
Organize evidence, update SPRS scoring, and complete annual self-assessments.

Risk & Change Oversight
Manage risks, POA&Ms, and changes so security and compliance remain current.

Managed Security, Compliance & User Operations

Continuous SOC Operations
Monitoring, threat hunting, incident response, and vulnerability management.

Continuous Compliance
Access reviews, device compliance monitoring, software reviews, CUI searches, risk reviews, and change control.

End-User Support
Onboarding, offboarding, user administration, service and change requests, license management, and cybersecurity awareness training.

Build lasting value with a cybersecurity program you can own, scale, and sustain. Let's talk about what that could look like for your business. →

Why the DTS Model Works for You

You Own the Investment
Your environment, configurations, documentation, and operating processes stay with your organization.

Grow Without Starting Over
Expand users, business units, virtual desktop infrastructure, DevSecOps, identity capabilities, and new workloads on the secure foundation you already have.

Reduce Gaps Between Security and Compliance
One integrated team aligns your technical controls, operational processes, evidence, and compliance requirements.

Stay Compliant as Requirements Evolve
Ongoing security, risk, change, and evidence management keeps your environment aligned as your business evolves.

Why Contractors Choose DTS

An Army-Vetted Cybersecurity Partner
Choose a U.S. Army-selected Verified External Service Provider whose cybersecurity approach underwent an extensive evaluation for the NCODE program.

One Accountable Partner
Bring cloud architecture, cybersecurity operations, compliance, evidence, and risk management together—reducing handoffs, gaps, and vendor coordination.

Results You Can Build On
Benefit from proven client outcomes, including perfect 110 SPRS scores and compliance programs designed to last.

DIB Experience from the Inside
As an SDVOSB federal contractor, DTS operates under and has implemented the same cybersecurity requirements as the Defense Industrial Base organizations we support.

Credentials & Certifications

GSA Contract Holder

CMMC L2

Trusted Partner Ecosystem

Microsoft Cloud Solution Provider · AvePoint · carahsoft · NINJIO

Build lasting value with a security foundation you can own, scale, and sustain.
